patagonia®

Eight days a week

We’re in business to save our home planet.

This is the challenge Yvon Chouinard gave Patagonia when he updated our reason for being in 2018 for the first time in years. It’s a lofty goal, and one that shapes every item of clothing, every donation, every activist campaign. It’s also one we’ll never reach on our own.

Patagonia Group Sales is one way we get professionals all over the world involved in solving our intertwined social and environmental crisis. Through the program, like-minded companies can outfit their teams with products that not only offer top-tier performance but also are built using recycled fabrics and designed for repairability, to reduce the need for virgin materials and to extend their life span as much as possible. Many are made in Fair Trade Certified® factories, to support the workers who make them, and many are also made with fibers like organic cotton or hemp, which are grown with lower environmental impacts than conventional crops.

We also believe that a product’s life span shouldn’t be limited to business hours. So, choose the best gear for your team—from outerwear to warm-yet-wicking baselayers to our tough-as-nails Workwear line—knowing it will keep them warm, dry and comfortable through the workweek and on any out-of-office trips through the weekend.

You’re proud of your employees. We’re proud to help them enjoy the planet as passionately as they’re working to save it, during business hours and beyond.

To learn more about Patagonia Group Sales, visit our website at Patagonia.com/group-sales or contact us directly at 800-470-7458 with any questions.

Logos are back

Plus a few new options for branding that keep our logo gear in play longer.

Each day at Patagonia, we look for ways to use our business to save our home planet, and that starts with creating goods that last a really, really long time.

When we realized that adding an additional nonremovable logo to a garment could significantly shorten its life span, we made the difficult choice to stop approving additional logos altogether, until we could figure out a way to do so without dooming our gear to an early grave in a landfill.

That's why we're excited to announce that we're once again authorizing custom third-party logos on our gear. This time, however, we're doing it a little differently.

Embroidered logos have long been considered permanent, meaning even a tiny logo could reduce the life span of a garment in a big way. It is now possible to effectively remove embroidered logos from most garments and add a new logo if needed.

But scrubbing and adding new logos to help keep gear in play only solves half the problem. The other half: finding a way to recapture logo'd garments that people no longer want at all. So, we figured out a way to add a patch over existing corporate logos, which will enable us to take them back and then resell them through our Worn Wear[®] program. Even after your employees have outgrown their Nano Puff[®] jackets or Better Sweater[®] quarter-zips, someone else will be able to continue enjoying those garments for years to come.

Of course, our favorite option is to forgo added logos on your Patagonia gear altogether. Instead, we suggest supplementing your gear with useful branded items such as lanyards, name tags and water bottles for your crew to distinguish themselves as part of your company. Another option is to work with a third-party decoration facility to apply removable branding such as a zipper pulls, luggage tags or woven hem labels. All are extremely versatile, easy to remove or replace, and can even be reapplied to another jacket or pack if a team member moves on.

Our Group Sales program is small, and we accept applications on a case-by-case basis, but please reach out to discuss options for bringing our gear to your team.

Thank you for being a Patagonia customer and advocate. But, most of all, thank you for giving a damn about saving our home planet.

Inter-Fluve employees at Prichard Creek, a current project that aims to remedy previous harm from mining and improve habitat for native trout. Idaho. Inter-Fluve

Customer Testimonials

“

“Both New Belgium and Patagonia share a commitment to being B Corporations, which means our partnership is built on a foundation of ethical and responsible business practices. Customers and competitors recognize the craftsmanship and environmental consciousness that define our products.”

Matt Jones, Pacific Northwest Regional Director, New Belgium Brewing

“

“Our work brings us to remote rivers in all corners of the US, and during all seasons. Sometimes, we are thrashing through dense willow brush and thorny blackberries in the heat of late summer. Other times, we're tested by unrelenting, bone-chilling rains in the Pacific Northwest. When we're lucky, it's somewhere in between. We regularly use Patagonia packs, jackets and layers to keep us comfortable (and stylish) in all conditions.”

Kristen Godkin, Development Director, Inter-Fluve

Daypacks

Our daypacks feature intuitive organization and durable constructions for wherever you’re bound. They’re built from recycled polyester with a durable water repellent coating made without intentionally added PFAS, or from 100% organic cotton canvas with a PU coating. Made in a Fair Trade Certified™ factory. Imported.

The skeleton in our closet

A not-so-spooky story about recycled bags.

Our Black Hole® duffels have been a lot of places since they were first released in the 1990s. They've weathered the snowiest mountains, the thickest jungles, the hottest deserts and the most chaotic city streets, traveling on all manner of air, water, land and animal transport with a sheeny flair.

But that iconic, glossy exterior is also the bag's dirtiest secret.

The material in question is TPU, short for thermoplastic polyurethane, and it's this flexible plastic coating that makes Black Hole fabric so resistant to water, abrasion and general abuse. It's not the main ingredient—think weatherproof paint applied to an already sturdy house—yet it makes up nearly half the fabric's weight. And, until recently, there was no recycled alternative. “It was that one skeleton in the closet,” says equipment designer Evan Daniel.

We've been using recycled materials for the body fabric, webbing and daisy-chain loops of our Black Hole bags since 2018 and had been considering similar options for TPU since 2016. We knew the material was out there and knew it could repurpose a lot of waste: For every 1,000 pounds of virgin TPU created, 75 pounds are thrown

out. But we were less certain if we could make the swap and preserve the renowned Black Hole sturdiness.

“Everything was telling us not to do recycled TPU,” Daniel says. “Doing the right thing often causes headaches later.”

So, we started slowly. We experimented on the new material in the lab. We took one duffel on climbing trips in Colorado and California, and then chucked it out of a bush plane onto an Alaskan glacier. With each test, we made tweaks and adjustments until we were sure the recycled fabric—which has a matte finish instead of the classic gloss—matched its predecessor's unwavering durability.

“There's no ‘blue bin’ for recycled TPU,” Daniel says. “And when you're dealing with trash, there's lots of things you can't control. It's like a puzzle to solve.”

Solve we did. We began using recycled TPU for select Black Hole bags in Fall 2022—an industry first. In Spring 2024, we used the new material in Black Hole duffels, and in Fall 2024, we made the swap for our rolling duffels, so now the entire line features recycled TPU.

The new Black Hole bags may not have their iconic shine, but that's just fine with us. Traveling is a lot easier without a skeleton in your duffel.

Torrentshell

Simple and unpretentious, our Torrentshell 3L Rain Jacket provides long-term comfort and protection in soaking storms and steady drizzles. We named it 3L for its 3-layer shell, which consists of 100% recycled nylon face fabric with a durable water repellent finish, an engineered polyurethane membrane and a tricot backer that work together to meet our rigorous H₂No® Performance Standard. The fabrics, membrane and finishes are all made without intentionally added PFAS. Made in a Fair Trade Certified™ factory. Imported.

No business on a dead planet

Being a 1% for the Planet® member and Certified B Corp.

Why did Yvon Chouinard update our official purpose statement to “We’re in business to save our home planet”? That’s because we believe business can play a crucial role in stopping the myriad threats facing life on Earth, but only if those businesses take concrete action toward protecting the well-being of our planet and its denizens. We also believe such efforts mustn’t come at the cost of success. In fact, history has proven they can even strengthen a company’s bottom line ... and help save the planet in the process.

In 1985, Patagonia began pledging 1 percent of our sales to the preservation and restoration of our natural environment; in 2002, Chouinard and Craig Mathews, owner of Blue Ribbon Flies, founded 1% for the Planet, a nonprofit that encourages other businesses to follow their example. The organization now has over 4,800 members—from companies like New Belgium Brewing to individuals like musician Jack Johnson—who’ve donated more than \$672 million to domestic and international grassroots environmental groups.

We took another more holistic step in December 2011 when we became a Certified B Corporation, and in January 2012 we formally registered as the first benefit corporation in the state of California. B Corp certification means our company’s overall environmental and social performance has been measured and independently verified by third-party company B Lab. Their evaluation goes beyond products or even the supply chain, encompassing a company’s operations, business model, community impact, materials, charitable donations, employee benefits and—as Chouinard noted—even its purpose statement.

On September 14, 2022, Patagonia announced a new ownership model. “We’re making Earth our only shareholder,” said founder Yvon Chouinard. Now, every dollar that is not reinvested into Patagonia will be distributed as dividends to protect the planet. Nancy Pastor
